

Gas Out Game

Play Your Card but **DON'T PASS THE GAS!**

~~Fart here!~~ Start

How to Set Up the Game:

NOTE: BEFORE YOU PLAY, MAKE SURE THE UNIT IS SWITCHED FROM THE "TRY ME" POSITION TO THE "ON" POSITION.

Put me in the middle of the table where everyone can see and hear me! To get the full sound benefit of my intestinal discomfort, a table is best.

2

Shuffle the cards and deal 3 to each player. Always draw back up to 3 at the end of your turn.

CONTAINS:

- GUSTER the GAS CLOUD™
- 56 GAS OUT™ CARDS

The youngest player goes first and play goes clockwise.

3

Place the rest of the cards face down for a draw pile. You'll form a discard pile as you play right next to the draw pile.

Ages 5+ 2-6

How to Play:

1 On your turn, place any card from your hand down on the discard pile. What you do next is determined by which card you've played:

2 If you play a **NUMBER CARD**, press me as many times as the number shown.

This is important:
IF I FART, YOU'RE OUT!

Once I've farted, keep playing with the remaining players. Again, place cards down and push me, skip a player or reverse directions!

3 If you play a **SKIP** card, the next player is skipped.

If you play a **REVERSE** card, play changes to move in the opposite direction.

Note: in a 2-player game, if you play a Reverse card, it means you go again right away!

REMEMBER, if YOU make me fart, YOU'RE OUT!

You'll hear the pressure build as you push me but there's no doubt when I've farted! **BOY howdy!**

BATTERY INSTALLATION

1. Open battery cover with Phillips head screwdriver (not included).
2. Install 2 new 'AA' alkaline (LR6) batteries in the orientation (+/-) shown.
3. Replace battery cover and tighten the screw.

For best performance, use only alkaline batteries.

Replace batteries when sounds become distorted.

batteries included are for demonstration purposes only.

BATTERY SAFETY INFORMATION

In exceptional circumstances batteries may leak fluids that can cause a chemical burn injury or ruin your product. To avoid battery leakage:

- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the product before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Do not mix old and new batteries.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the product.
- The supply terminals are not to be short-circuited.
- Dispose of battery(ies) safely.
- Do not dispose of this product in a fire. The batteries inside may explode or leak.

Protect the environment by not disposing of this product with household waste [2002/96/EC]. Check your local authority for recycling advice and facilities.

Keep these instructions for future reference as they contain important information.
